Who We Are and What We Do

Urangatang Employs 100+ Web Development Professionals

Urangatang consists of more than 100 web professionals. These world-class developers have teamed together under one umbrella, bringing you the perfect blend of skill and ability. When you select Urangatang, you are choosing a seamless solution. Our members will work together to precisely coordinate and perfect every single aspect of your project, with or without your daily involvement.

Our Experts Work Together to Meet All of Your Needs

Urangatang offers experts in programming, web development, graphic arts, animation, multimedia design, usability, and so much more. Our behind-the-scenes programming skill is boundless, and includes application development in multiple languages, both small- and large-scale scalable sites and software suites, database development and integration, quality assurance, user interface expertise, skinning technologies, and hundreds of other skills too numerous to list here.

Our Specialties

- **eCommerce / Order Fulfillment**
From general products and checkouts, to a combination of products, services, and "virtual" products and memberships, we set it up for you.
- **Custom Administration Panels**
Our custom administration panels allow you to manage your core function quickly and efficiently.
- **Navigation Systems That Focus On Growth**
Our custom menus allow you to grow when you need to grow, without breaking the architecture.
- **Complex Application Development And Installation**
Our programming abilities are limited only by your imagination.
- **Migrations and Transfers**
Whether you are migrating to a license-free platform, or transferring from one host to another, we help eliminate downtime.
- **Website Maintenance / Webmaster On Call**
Regardless of who designed your site, we can maintain it by performing updates and minor revisions for you on a regular basis or when needed.

- AutoCad
- Bryce
- Corel Photo-Paint
- CorelDraw
- Fireworks
- Flash
- Freehand
- Illustrator
- InDesign
- Paint Shop Pro
- PhotoShop
- Poser
- procreate Painter
- QuickTime
- Visio

Developers

- CSS
- DHTML
- HTML
- Dreamweaver
- Dreamweaver UltraDev
- FrontPage
- HomeSite
- SSI
- TopStyle
- Visual InterDev

Programmers

- ADO
- CDO
- MDAC
- Oracle
- .NET
- JDBC
- ODBC

Programmers (continued)

- Active Server Pages
- ASP.NET
- C
- C#
- C++
- ColdFusion
- Java
- Java Server Pages
- JavaScript
- Perl
- PHP
- SQL
- VB Script
- VB.NET
- XHTML
- XML
- XSL
- UML
- VRML
- WML
- Crystal Reports
- Site Server
- Visual Basic
- VBA
- Visual C++
- Visual Web Developer
- ActiveX Controls
- Client and Server
- COM
- eCommerce Enablement
- Miva Merchant
- SSL
- Win32 API Calls
- Wireless Application Protocol (WAP)
- Enterprise Server
- IIS
- PWS

What We've Done...

Sample Federal Government Customer:

Business Council for International Understanding (BCIU)
A White House Initiative

This extremely sophisticated site permits multiple administrators in multiple White House locations to administer events that thousands of world leaders attend each day, and to arrange every detail of those events from registration to payment, notification, etc. The site is quite remarkable, and would require an in-person visit from your Urangatang representative to log in and display it properly for you.

What We've Done...

Sample State Government Customer: The State of Virginia

Created 10 interconnected, complex websites for the State of Virginia.

You can view some of the completed works at:

<http://western.vaems.org>

<http://lfems.vaems.org>

<http://northern.vaems.org>

<http://odemsa.vaems.org>

<http://tidewater.vaems.org>

What We've Done...

Sample Commercial Customer: Game Show Network (GSN)

Urangatang built the software that ran a television game show. Players would buzz in, multiple podiums would display a particular question, the player would choose from the possible answers using a touch-screen, and the computer would calculate right and wrong answers, causing the podium to light up indicating who would continue into the next round. Our system handled everything, including all of the score-keeping, the list of questions and possible answers, handling multiple tie-breakers, and more.

The software was created in record time... less than 6 weeks. The television show was called "National Vocabulary Championship." You can view more information on the Game Show Network site at www.gsn.com/corporate/press.php?release_id=267, or on Wikipedia at http://en.wikipedia.org/wiki/National_Vocabulary_Championship.

A Few Testimonials

"We were thrilled to find a web developer who could easily take on our project of such large scope and engineering effort. **Urangatang** was able to understand our vision, translate it into a tangible reality, and deliver a comprehensive solution to all of our needs. They think of everything! Through intelligent programming design, they provided features that we hadn't even thought to ask for and which made a world of difference. **Urangatang** responds quickly, is reliable, flexible and is an absolute pleasure to work with."

Maya Autret, Managing Director
Business Council for International Understanding (BCIU)

"When we recently needed a custom application, **Urangatang** provided us with a unique and innovative solution that helped us achieve our objectives. In fact, the innovation behind that particular software now has four patents in software design."

Lou Lombardi
Project Director, Avaya

"The web design services that you provide are as excellent as they are comprehensive. Your vision to provide such a wide spectrum of web development services is awesome. I have never been so blessed by a company that has such tremendous integrity and commitment to customer satisfaction. I thank you for providing your expertise to me with such great quality.... I am so amazed and satisfied to have given you my business that words cannot express. I am going to "tell it on the mountain top" that **Urangatang** is the number one company for ANY web-based need."

Our Structure and History

- Our staff consists of approximately 100 developers, project managers, and sales people.
- Approximately 95% of our staff members are located within the United States. Most of our staff works from a home office. We have been successfully co-developing a remarkable array of complex websites since Urangatang was founded in 2001.
- Our project management process is 100% automated. Our internal website (at www.urangatang.net) manages everything from project planning to project documentation, trouble reporting and resolution systems, status reports, reminder systems, invoicing, follow-up, and more. The site that we developed to run our own infrastructure is so powerful that we have received numerous requests to sell or share it as an internal management software product.
- Web site development and programming represents 100% of our income.
- We are a small, woman-owned LLC company, and are not planning any mergers or IPOs.

About Our Founder

Linda C. Uranga-Norton

President and Founder, Urangatang Web Design, LLC

Professional Profile

For the last thirty years involved in forefront communications technologies.

- Internet: As a member of System Development Corporation in the mid 1970's, helped establish the protocol foundation of the Internet, i.e. TCP/IP standards, etc.
- Ethernet: For Xerox Corporation, in the early 1980's, helped launch and position product introductions of the first hard drives and desktop publishing systems as well as the Ethernet platform.
- Artificial Intelligence: In the mid 1980's, as a member of Dictaphone Corporation, tested the world's first artificial intelligence system.
- Email: As a founding member of Syntrex Corporation from the mid to late 1980's, helped to test and refine the world's first email system.

Career Highlights

- For Bell Laboratories: from 1997 to 2000, developed Guide Builder, an internationally-recognized software product that generates custom documentation on demand. This award-winning program, released immediately by Bell Laboratories, generates more than \$1,000,000 in revenue annually, and immediately displaced more than 100 paper documents as the de facto standard for quality deliverables in customer support.
- For CommTech Corporation: as a founding member of this \$275 million-dollar corporation - and world-renowned provider of end-to-end service order management, provision and activation software - created all marketing, education, communications, and documentation standards and tools.

Patents

- Patent Number 6,272,508 B1, "Guide Builder for Documentation Management in Computer Applications" - Published August 7, 2001 for the following 4 inventions: Environmental If-Statements, Automated Translations, Button Labels, Platform Sharing.
